- > Minimize liability
- > Help the environment
- > Conserve raw materials

Our goal is the responsible reuse, remanufacture or recycling of electronic equipment.

Allow us to manage your EOL electronics and minimize your disposal liability. With our EOL process you will have all of the documentation proving your electrons have been responsibly reused or recycled.

Responsible Reuse,  
Remanufacture, and  
Recycling of Electronic  
Equipment

## Enviro-Electronics LLC.

### Who we are

Our team is made up of professionals who understand your needs. With more than 50 years in the recycling industry we have created a winning program to manage your end of life (EOL) electronics.

The International Association of Electronic Recyclers forecasts continued rapid growth in e-scrap recycling. It is estimated that 3 billion computer units will be discarded through the end of 2010 (an average of more than 400 million a year). Included in the total are

### What we do

#### 1 Cost effective management of end of life electronics including:

- > Assessment for reuse
- > Logistics
- > Detailed inventories
- > Tracking destruction and recycling certification

#### 2 Minimize your liability concerns:
